

Current commutator CI-60A

Technical characteristics of the current commutator CI-60A

Switching current/voltage – 60A/100V. Mains supply voltage $220V \pm 10\%$ - 50Hz.

Internal battery 12V/2.3Amh.

LCD indicator 2x16

Programmable shutdown time duration - (0.01..10.00) sec.

Programmable activation time duration - (0.1...50.0) sec.

Programmable duration of cycle start delay time - (0.00...5.00) sec.

Programmable switching cycle start and end time.

Programmable switching cycle start and end date.

Three programmable switching modes.

Programmable commutation phase.

Programmable state of the commutator in STOP mode.

Time zone setting UTC ± 10 hours.

USB connection for PC connection.

Switch dimensions 27cm x 24.6cm x 12.4 cm Switch weight 1.8 kg.
